Problem

Smoke baffles that are required in retail outlets often conflict with signage and display requirements. Thus a solution that provided minimal impact was required.

Solution

Smoke Control provided a solution for the retail outlet by installing SmokeDam clear smoke baffles. The SmokeDam smoke baffle system can be supplied and installed in an unlimited length and is easily retrofit in existing buildings.

Design Considerations

The system was required to be light weight and clear to ensure that it didn't conflict with the aesthetics of the building design. In addition, the system had to be readily available and quick to install.

Deemed-to-Satisfy

The SmokeDam smoke baffle system complies with the BCA specification E2.2b, Clause 4 "Smoke Reservoirs" .

*Note: Each project is unique and usually requires the involvement of a Fire Safety Engineer.
Please contact us to discuss the suitability of this solution for your project.*
