## Problem

New shopping centre with limited roof space for natural light, natural ventilation and smoke exhaust.

## Solution

Installation of a 3x 8m long banks of operable windows and frameless louvers. The bottom hinged Inova operable smoke vent windows provided the required smoke venting in fire mode and the whole system provides natural light and natural ventilation in normal day-to-day use.

## Design Considerations

The system design shall provide zero water leakage and reliable day-to-day operation.
