Problem

Combining lighting, natural ventilation and smoke/heat release vents that aesthetically add to the design of the building.

Solution

Inova® Operable Windows. 36 windows from 1571mm wide x 1086mm high to 3026mm wide.

Design Considerations

The building must be provided with high-level louvres for smoke-and-heat ventilation mounted along the side walls of the building and automatically activate upon operation of the smoke detection system. Tested to EN12101. Fully concealed operating systems.

Client

Kinross Wolaroi School

Builder

Rawson Constructions

Fire Safety Engineer

DeFire

*Note: Each project is unique and usually requires the involvement of a Fire Safety Engineer.
Please contact us to discuss the suitability of this solution for your project.*
