Problem

No smoke separation in ceiling cavity in existing building.

Solution

Retrofit SmokeHalt to extend smoke walls to the underside of the ceiling.

Design Considerations

Existing building with limited access. SmokeHalt is supplied in rolls and is easily transportable through manholes and tight spaces. SmokeHalt is easily cut and installed in the confines of the ceiling cavity.

Client

Grindley Constructions.

Fire Safety Engineer

Deemed to Satisfy Solution certified by Smoke Control

*Note: Each project is unique and usually requires the involvement of a Fire Safety Engineer.
Please contact us to discuss the suitability of this solution for your project.*
