Smoke Control's Full Life Cycle Service ensures that at any stage of the project – from design through to commissioning – the only company responsible is Smoke Control

100% QUALITY

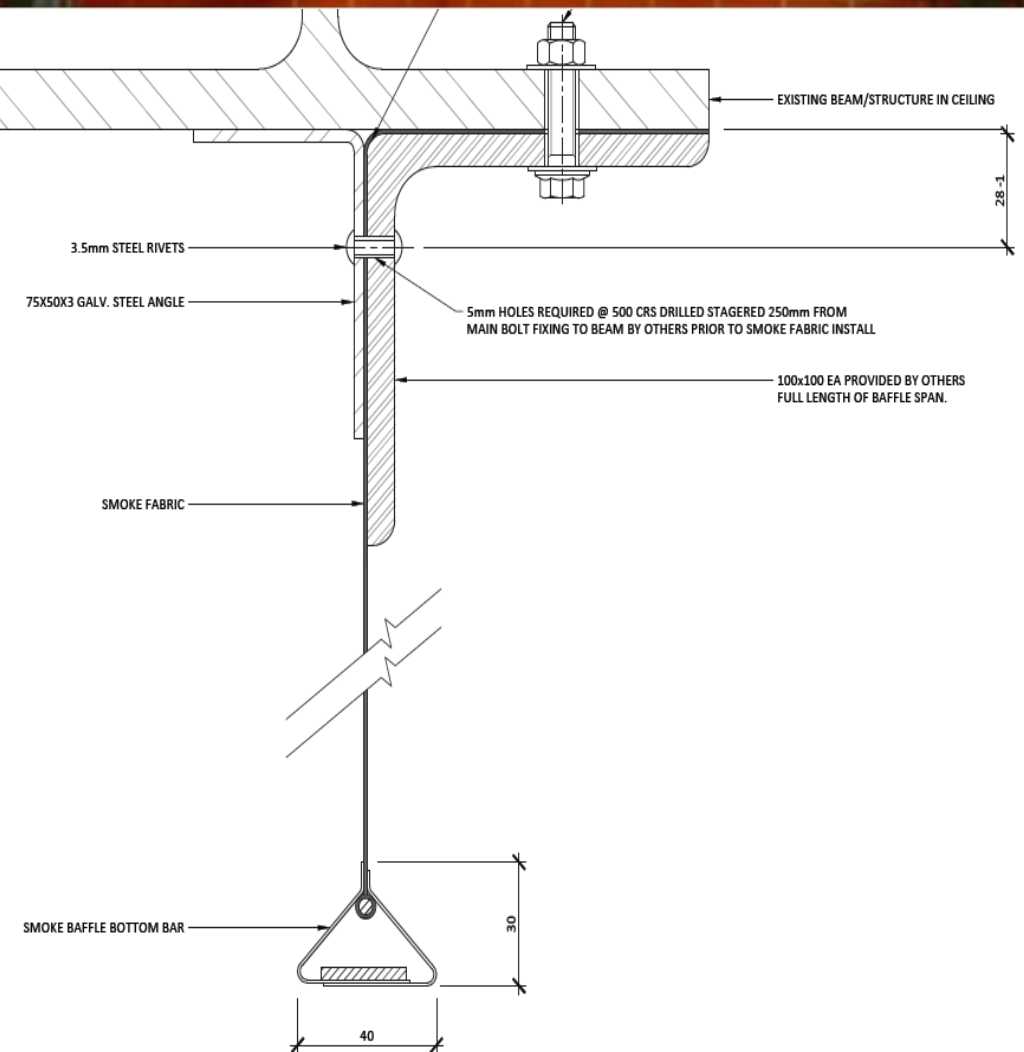

The SmokeHalt Draft curtain was designed and engineered as flexible lightweight solution to meet the requirements of zone compartmentation. It is also constructed in Australia by a 100% owned and operated Australian company.

Designed to suit openings of unlimited width and up to 5m Height.

So why the SmokeHalt Draft curtain?

- Flexible lightweight design
- Easily retrofit to existing buildings
- Economical
- High quality product with sewn edges to prevent fraying
- Designed for use in warehouses, aircraft hangers and manufacturing facilities
- Tested to 600 °C for 30 and 60 minutes. (ie: D30 and D60)
- Models available for 1100 °C for 30, 60 and 120 minutes (ie: DH30, DH60 and DH120)
- 1 year conditional warranty

100% Customer Service

Smoke Control offers obligation free technical support throughout your design and documentation stage. We are also happy to provide obligation free pricing so that you can accurately prepare your budgets

We have also prepared a complete kit for your documentation requirements. Simply download from our website a complete set of specifications and drawings. If you would like our drawings in DWG format, simply give our technical department a call or email your request.

We will endeavour to respond the same day !

100% Flexibility

Lightweight in design, the SmokeHalt Draft curtain is designed to be a cost effective solution for smoke compartmentation.

Flexible design allows for various service penetrations.

Improves efficiency of smoke venting and/or mechanical smoke exhaust systems.

Bottom weight bar can be powder coated any colour in the Dulux Duralloy range to match clients tastes and building structure. We can also arrange to have other powercoat colours applied if desired, call to discuss!
