C2 Barangaroo
SYDNEY, NSW

smoke containment screens • smoke curtains • fire curtains • horizontal fire curtains • concertina fire curtains • smoke and heat release vents • natural ventilation • fire resistant glazing • horizontal glazing • glazed fire doors • metal fire shutters • lateral fire shutters • bush fire flame zone shutters • flame zone windows
**Problem**
The C2 building in Barangaroo required adequate fire and smoke protection within the north and south openings of the fire exit stairwell which can allow sufficient occupant movement in the event of a fire.

The C2 building sets an industry benchmark as the first timber, modern framed commercial office building in Sydney. Smoke Control has been requested to cater to the required fire and smoke safety requirements.

**Solution**
Smoke Control has supplied and installed 11 Visioneering® steel framed glazed doors with a fire rating of -/60/- (with radiant heat shielding) over the north and south openings which comply with Australian Standards 1530.4, AS1905.1 & the Performance Solution.

**Client**
Lendlease

*Note: Each project is unique and usually requires the involvement of a Fire Safety Engineer. Please contact us to discuss the suitability of this solution for your project.*
