DATA SHEET

STROBE SOUNDER

FOR CURTAIN OPERATION

OVERVIEW

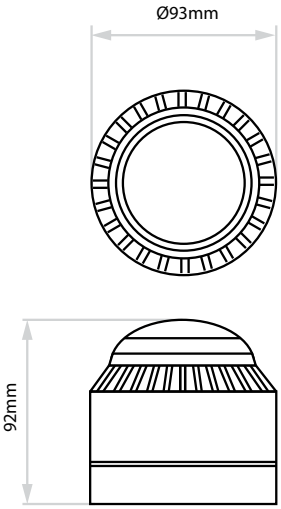

The Smoke Control Strobe Sounder is an audible and visual device which requires one single installation point and is used to warn of curtain movement. This greatly reduces installation time and costs and is much less obtrusive than two separate devices. Versions are available with the sounder and beacon linked, or with separate terminals for independent operation.

Installed on either side of the curtain, the strobe flashes red when curtain is deploying or retracting.

Optional sounder of either Voice or Alarm.

FEATURES

- High Output Sounder Beacon
- Automatic Sounder Synchronisation
- Volume Control
- Base Compatible With The Rolp & Solex Beacons
- Lockable Base

Voltage	18-28Vdc (24V)
Current	68mA 24 V (Typical Tone 3)
